## SUMMARY

**Mobile Application Developer** with 2+ years of experience shipping cross-platform Android and iOS apps with **Flutter** (Bloc, GetX, Clean Architecture) and **React Native** (Redux Toolkit, Context API, Hooks, React Navigation). Delivered apps across professional networking, e-commerce, real-time chat, lottery operations, and AI styling with subscriptions, including 2 apps live on **Google Play** and 4+ payment/in-app purchase integrations.

Experienced with Firebase and Supabase backends, **PayPal**, **Stripe** and other payment gateways, **RevenueCat**, FCM, deep linking, and ZegoCloud voice/video. Own features end to end: architecture, UI/UX, APIs, authentication, payments, push notifications, testing, store listings, and **Google Play / App Store** release (TestFlight for iOS testing). Use AI tooling (Claude, Cursor, Gemini, Google Antigravity) to speed up development.

## EXPERIENCE

**Mobile App Developer (Rev9 Solutions)** *11/2024 – Present*
*Jhelum, Punjab*

- Ship and maintain mobile app features (Flutter) for production apps (professional networking, AI styling, lottery) on Google Play and internal deployments
- Integrate REST APIs, payment gateways, and analytics end to end, from architecture and UI through to store release
- Improve reliability and performance by handling async flows and integration edge cases within a maintainable, Clean Architecture codebase
- Collaborate with cross-functional and backend teams on API contracts, feature delivery, and testing

**Mobile App Intern (Rev9 Solutions)** *08/2024 – 10/2024 (3 months)*
*Jhelum, Punjab*

- Built cross-platform mobile modules with Flutter, Dart, Dio, and Supabase, including orders and authenticated e-commerce browsing
- Implemented real-time engagement features: push notifications via FCM and Supabase Edge Functions, and voice/video chat with ZegoCloud
- Built responsive UI with Bloc and Streams on Clean Architecture; improved performance through caching and network optimization

## PROJECTS

**Pantsuit Professionals (PSP) — Professional Networking**
Cross-platform networking app with authentication, payments, and content publishing (mobile and web). Live on Google Play; App Store release coming soon.
**Links:** Google Play | App Store (coming soon)

- Delivered end to end: architecture, UI/UX, APIs, authentication, and store-ready release
- Implemented email/OTP sign-in plus Google, Facebook, and Apple OAuth
- Built deep linking for membership, payment, and content flows
- Integrated PayPal, Stripe, and payment gateways for memberships and subscriptions
- Added Firebase notifications and Firebase/Google Analytics for engagement and behavior tracking
- Delivered content publishing (jobs/events/articles) and Google Play privacy/compliance requirements
  *Stack: Flutter, Firebase, OAuth, Deep Linking, PayPal, Stripe, Analytics*

**CNP Lottio — Lottery & Payments**
Lottery app built from scratch covering sortitions, tickets, and prepaid bill payments.

- Built with Clean Architecture (Flutter) through testing and deployment
- Implemented the sortition system, play validations, and full ticket lifecycle (create, delete, duplicate, monitor)
- Added prepaid payments with PayPal and Stripe, sharing payment workflows with existing transactions
- Synchronized with the web platform through real-time API integration
  *Stack: Flutter, REST API, PayPal, Stripe, Clean Architecture, Dio*

**Color Match (Agile Styling) — AI Styling & Subscriptions**
Photo-based AI styling app with in-app purchases, shipped on Google Play and the App Store.
**Links:** App Store | Google Play

- Managed store listings, TestFlight and Play testing, and in-app purchase compliance for both stores
- Integrated RevenueCat for subscription tiers (Silver/Gold/Platinum/Diamond), consumable match packs, and coupon/referral discounts
- Added FCM push and local notifications
- Delivered photo-based AI matching with an overlay match UI
  *Stack: Flutter, RevenueCat, IAP, FCM, StoreKit, App Store, Google Play*

**Wardrobe Chat — E-commerce & Real-time Chat**
Clothing e-commerce app with live chat, maps, and voice/video calling.

- Built end to end: authentication, product catalog, cart, chat, calls, and push notifications
- Integrated Dio for APIs and Supabase for backend services, including order management
- Implemented real-time chat with Google Maps locations, ZegoCloud voice/video calls, and WhatsApp-style attachments
- Managed state with Bloc and Streams; delivered FCM notifications via Supabase Edge Functions
  *Stack: Flutter, Supabase, Dio, ZegoCloud, Bloc, FCM*

## EDUCATION

**Riphah International University**, Lahore, Punjab — Bachelor of Science in Computer Science

**Army Public School and College**, Jhelum, Punjab — Intermediate in Pre-Engineering

## SKILLS

**Languages & Frameworks:** Dart, Flutter, React Native, Next.js, Python, PHP

**AI & Assistants:** Claude, Cursor, Gemini, Google Antigravity

**Backend & Integration:** REST API, Firebase, Supabase, Dio, ZegoCloud

**Analytics & Notifications:** Firebase Analytics, Google Analytics, Firebase Cloud Messaging (FCM), Deep Linking

**Payments & Auth:** PayPal, Stripe, Payment Gateways, RevenueCat (IAP/Subscriptions), Google Sign-In, Sign in with Apple, StoreKit, Google Play Billing

**Stores & Delivery:** Google Play, App Store, TestFlight, UI/UX, Responsive Testing

**Practices:** Bloc, GetX, Streams, RxDart, Redux / Redux Toolkit, Context API, Hooks, React Navigation, Jira, Slack, Clean Architecture, Performance Optimization
